

CFM INTERNATIONAL EU DATA ACT NOTICE

Data Access and User Rights Information

Effective Date: September 12, 2025

Last Updated: August 28, 2026

What This Notice Covers

In compliance with Regulation (EU) 2023/2854 (the “**EU Data Act**”), CFM International (“**CFM**,” “**we**,” “**us**,” or “**our**”) provides this notice to inform CFM customers and Users of CFM connected products about data rights and responsibilities for CFM connected products, related services, and data processing services (“**Notice**”). This Notice explains your rights and our obligations when CFM acts as seller and/or lessor of CFM connected products.

Scope

The EU Data Act applies within the EU, meaning that the User (as defined under the EU Data Act) shall be established in the EU, the connected product(s) shall have been placed on the market in the EU, and any third-party recipient shall also be EU-based.

Data

The data in scope for sharing under the EU Data Act is data retrieved by CFM in relation to the connected product(s) that is raw (i.e. unprocessed) or pre-processed (i.e. modified to be understandable and usable for further analysis). Where technically feasible, these data shall be provided in a commonly used, machine-readable format.

Access

The User may request access to data and CFM may provide the data to the User when CFM is the Data Holder (as defined under the EU Data Act) and the User lacks the independent means to export or access their data. In many cases, CFM already makes product data available to Customers by default and design. Where CFM is not the Data Holder the User will need to contact the Data Holder directly for EU Data Act requests.

Changes to this Notice

CFM may update this Notice. Please revisit this Notice periodically to learn about any changes. Questions about CFM’s obligations under the EU Data Act may be directed to: diagnostics.inquiries@geaerospace.com
